

# RAINIER MARINE

## Rainier Bonded Windows Care & Cleaning

Rainier Bonded Windows are engineered and constructed to provide the benefits of glass-like clarity for years. With proper care and cleaning the windows will stay clear and the fabric will stay clean.

### **Cleaning Instructions**

1. **Rinse**
  - Rinse the windows to remove loose dirt, dust, or saltwater.
2. **Wash**
  - Wash the windows with a clean soft cloth soaked in soapy water (see cleaners below).
3. **Rinse**
  - Rinse away soap residue with fresh water.
4. **Dry (optional)**
  - To prevent water spotting - dry with a very soft, clean cloth.
5. **Polish (optional)**
  - Use a very soft, clean polishing cloth.

### **Tips & Cautions**

- Use a clean soft cloth (microfiber, soft cotton, diaper).
  - Never use brushes, paper towels, scrapers, or squeegees.
- When rinsing, use a wide spray pattern to avoid damaging the bonds between the window and fabric.
  - Never spray the glass with a “jet” stream of water from a hose and never use a power washer.
    - High pressure water will destroy the bond between the window and fabric.
- Always use a light touch – the windows can be damaged by aggressive scrubbing.
- Wash, dry, and polish in a sideways motion (level to the horizon) for best results.
- Wash in manageable size sections and rinse before the soap dries.
- Use recommended cleaners.
  - Other cleaners could be harmful to the fabric, thread, or the glass coating.

### **Cleaners**

- Liquid Joy®
- Mer-Maids Plexiglas/Plastic Cleaner
- Cee Bailey’s – Premium Windshield Cleaner

### **Polishes**

- Novus® 1 Plastic Clean & Shine
  - Meguiar’s M10 Mirror Glaze Clear Plastic Polish
- Notes:
- Avoid getting polishing agents on the fabric.
  - Polishes will help minimize the visual effect of minor scratches.

### **Hydrophobic Coating**

- RainMagic – The Liquid Windshield Wiper
- Cee Bailey’s – Rain Repellent Max
